

Unit 2: Chemistry of Life
Vocabulary Journal

Name: _____
Date: _____ **Per:** _____

Directions: Fill in the definition of each word. All words will be defined in class notes and discussions. I *highly* suggest that rather than coping the definitions from the glossary in the book, you find the definitions in your notes, or challenge yourself to come up with definitions that are in your own words. If there are one or two you are stuck on, you may use the glossary in the back of the book. This is an ongoing, unit long assignment, and will be collected and graded on the day of the unit test.

Element _____

Organic Compound _____

Monomer _____

Subunit _____

Building block _____

Polymer _____

Macromolecule _____

Simple Sugar _____

Amino Acid _____

Nucleic Acid _____

DNA _____

RNA

pH

Acid

Base

Neutral

Inorganic Compound

Mineral

Polar

Cohesion

Adhesion

Surface Tension

Density

State

Universal solvent
